

## Open Media Vault Connect to Wireless

1. Add a "non-free" component to `/etc/apt/sources.list`, for example:

```
# Debian 8 "Jessie"
```

```
sudo nano /etc/apt/sources.list
```

```
# Add this line to the end of page
```

```
deb http://httpredir.debian.org/debian/ jessie main contrib non-free
```

2. Update the list of available packages and install the `firmware-brcm80211` package:

```
# apt-get update && apt-get install firmware-brcm80211
```

3. Upgrade Open Media Vault

```
sudo apt-get dist-upgrade
```

4. `sudo reboot`

5. `sudo nmtui` → Activate a Connection

6. Select your Wifi Network → Enter the password

7. Connect

### Case-1

#### Unable to lock the administration directory (`/var/lib/dpkg/`)

```
sudo rm/var/lib/apt/lists/lock && sudo rm/var/lib/dpkg/lock
```

```
sudo dpkg --configure -a
```

### Case-2

#### GPG error No\_PUBKEY?

```
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys 82B129927FA3303E
```

replace the key with your key.
